

≧ print directions ≦

The “print version” of all of these zines is formatted so that when you print it on your printer, it will fold correctly. You’ll need to:

1. make sure it’s set to “landscape”
2. print double sided
3. choose “long edge” (not “short edge”)

The print dialog should look something like this:

Note 1: In North America, printers use letter-sized paper. Everyone else uses A4-sized paper. Use the version that works for your printer!

Note 2: Folks sometimes have problems printing from Chrome. Print from your PDF reader instead if you run into issues.

There's a 1-minute video showing how to fold a zine at <https://wizardzines.com/print>
